

Scientific Paper Writing: Special Focus on Environmental Sciences and Sustainability

Objective

Obtaining an insight into field-specific criteria of scientific writing and publishing in the fields of Environmental Sciences and Sustainability.

Description

Writing a paper in your field of research, finding the appropriate journal and finally getting your paper published requires a very specific knowledge of the writing and publication process in your discipline.

This workshop will give participants an introduction into the following topics:

- Journal selection
- Clear and concise writing
- Text problems and how to avoid them
- Process of submission
- Writing an appropriate covering letter
- Dealing with editor and referee feedback
- Writing and organizing your responses
- Writing responses to editor comments

This workshop is a complementary module to our general workshop program on academic writing. We strongly recommend attending one of those workshops to obtain an extended knowledge of academic writing and publishing.

Trainer

Dr. Andrew Davis
English Experience
Language Services,
Göttingen

- Professional scientific translator and editor
- Lecturer for scientific writing and communication for 20 years including at universities in England, Germany and Japan and for organizations such as the German Central Bank
